Introduction

This course explores the materials science of concrete, and attempts to bring about the understanding of concrete behavior from a fundamental perspective. The first part of the course discusses the structure and properties of concrete making materials. This is followed by mixture proportioning of high performance concrete, and a study of selected topics regarding fresh and hardened concrete behavior. The final part of the course deals with long term performance issues, related to creep, shrinkage and durability of concrete

Course Content

1. Concrete Production
2. Rheology of Concrete
3. Mineral
4. Chemical admixtures in Concrete
5. Ground Granulated Blast Furnace Slag (GGBFS)
6. Strength of Concrete: Strength
7. Elasticity, Creep and Shrinkage of Concrete
8. Microstructure of Concrete
9. Penetrability of Concrete
10. Durability of Concrete
11. Special Aggregates
12. High performance concrete.
13. Nano Technology in Cement and Concrete

Duration and Venue

The duration of the course on “ADVANCED CONCRETE TECHNOLOGY” is 40 hrs. The course will be conducted on Monday, Tuesday and Wednesday starting from 10thFeb 2021. The course will be conducted in one batch from 3:30 PM to 5:30 PM in evening. The course will be conducted at CG-12 in C Block.

Who may benefit

The workshop will be benefitting students in developing their skill on Concrete Technology. This skill will benefit the students in their career growth.

Organizing Committee

Mr. Teekam Singh (Asst. Prof.)
Mr. Jitesh Kumar Jain (Asst. Prof.)
Mr. Akhil Maheshwari (Asst. Prof.)
Mr. Yogesh Kumar Agarwal (Asst. Prof.)
Mr. Pradeep Kumar Jain (Asst. Prof.)
Ms. Nida Khanam (Asst. Prof.)
Mr. Hitesh Nagar (Asst. Prof.)

Enrollment will be strictly first come first serve basis and maximum students per batch is limited to 60 students.

Add On Course

From 1-03-2021 To 29-03-2021

Elementary Course on Machine Learning

OBJECTIVE

The purpose of machine learning is to discover patterns in your data and then make predictions based on often complex patterns to answer business questions, detect and analyse trends and help solve problems.

Machine Learning is the core subarea of artificial intelligence. It makes computers get into a self-learning mode without explicit programming. When fed new data, these computers learn, grow, change, and develop by themselves

Outcomes

Have a good understanding of the fundamental issues and challenges of machine learning: data, model selection, model complexity, etc.

Have an understanding of the strengths and weaknesses of many popular machine learning approaches.

Appreciate the underlying mathematical relationships within and across Machine Learning algorithms and the paradigms of supervised and un-supervised learning.

Be able to design and implement various machine learning algorithms in a range of real-world applications.

PRINCIPAL
Jaipur Engineering College &
Research Centre
Tonk Road, Jaipur-302022

Target

Third Year Electrical Engineering

Open for all

01-03-2021

Registration Fees : INR 1119

Prerequisites:

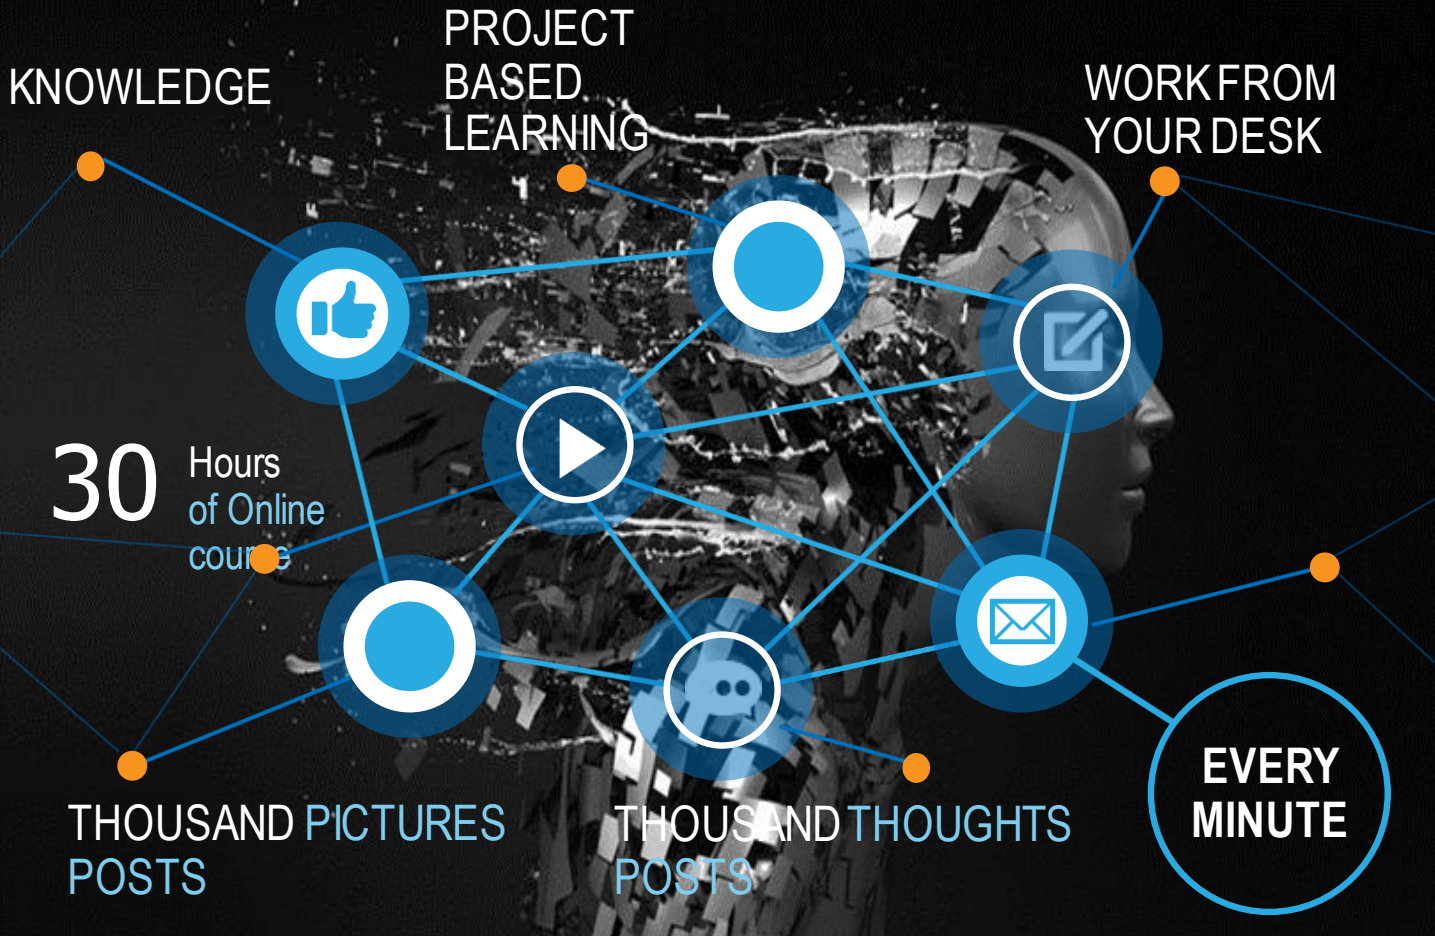

Machine Learning is a mathematical discipline, and students will benefit from a good background in probability, linear algebra and calculus. Programming experience is essential

Add On Course

From 29-01-2021 To 28-02-2021

Introduction to Deep Learning Using Python

OBJECTIVE

The purpose of machine learning is to discover patterns in your data and then make predictions based on often complex patterns to answer business questions, detect and analyse trends and help solve problems

The ability to process large numbers of features makes deep learning very powerful when dealing with unstructured data. However, deep learning algorithms can be overkill for less complex problems because they require access to a vast amount of data to be effective.

Outcomes

Distinguish kinds of deep models which are appropriate in supervised, semi-supervised and unsupervised applications.

Apply deep learning techniques in understanding of images and text.

Analyze and evaluate the performance of deep models.

Design deep models in a high-level programming language.

Target

Third Year Electrical Engineering

Open for all

TI 29-01-2021

Registration

Fees : INR 1119

Brochure of Google Cloud Computing Foundations: Create and Manage Cloud Resources

About JECRC Jaipur

Education is the foundation upon which a progressive nation and its citizens stands. JECRC Foundation, since its inception (17 years), has taken over the mission of nurturing students with the establishment of **Engineering Colleges in Jaipur**.

JECRC Foundation is ascribed as one of the leading educational groups in North India and strengthening the engineering culture. The Foundation is a leading education group, with institutes for Engineering, Management and Applied sciences.

The Foundation encourages all-round personality development through extra-curricular activities and competitive events. Students have also benefited from the Foundation's strong industry linkages and secured training & career opportunities with leading organizations.

Department of Information Technology

It is one of the oldest departments of the institute, offering a fine blend of experience and innovation in teaching in UG. The department provides a life-long learning experience, through its state of art laboratories, vast courses, and industry-orientation. A

vast collaborative framework with reputed universities world over, the department offers ample opportunities for individual growth.

About Jaipur

Jaipur, popularly known as the "Pink City", and "Paris of India", is the capital of Rajasthan state, India. Jaipur is worldwide famous for unique Architecture, Vastu, Astrology, Forts, Monuments, Palaces, Art and Craft, Culture and last but not least for unique Food. Jaipur is renowned on international tourism map as one vertex of Golden Triangle of Indian tourism.

Objectives of the Workshop

This course provides an overview of cloud computing, ways to use Google Cloud, and different compute options.

- Discuss what the cloud is and why it's a technological and business game changer.
- Describe the different ways a user can interact with Google Cloud.
- Discover the different compute options in Google Cloud.
