**JAIPUR ENGINEERING COLLEGE AND RESEARCH CENTRE, JAIPUR  
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**

**WORKSHOP ON ANGULAR**

**Event** : Workshop on Angular  
**Category** : Workshop  
**Area** : Web Application Framework  
**PO's Covered** : PO3, PO5, PO6, PO10  
**PSO Covered** : PSO1  
**Date & Time** : Saturday, May. 22, 2021 2:00 PM to 4:00 PM  
**Venue** : Online Platform- Zoom Meeting

**Expert** : Mr. Lal Babu Purbey  
Software Developer  
SYNORIQ PVT. LTD., Jaipur

**Contact:** +91-8559897329  
**E-mail:** lalbabu.purbey@gmail.com

**Company Profile** : Synoriq is a product-based company in Jaipur, who power up businesses and government with their engineering passion. Synoriq relishes solving the problem by utilizing its technological mind.

**Company Address** : UNIT NO S1 PLOT NO. 28 AYUWAN SINGH NAGAR MAHARANI FARMS JAIPUR, Rajasthan, 302018

**Company Contact** : <https://www.synoriq.com/>

**Departmental Organizer:**

1. Ms. Tanya Shruti (Assistant Professor, CSE Deptt.)
2. Ms. Neha Solanki (Assistant Professor, CSE Deptt.)

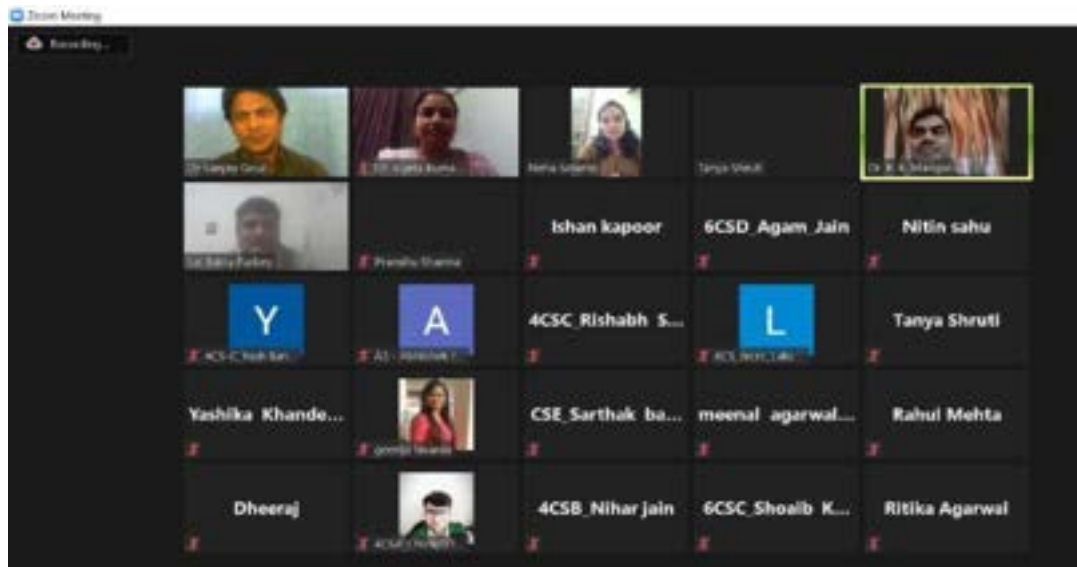

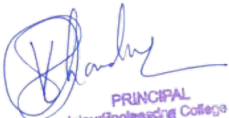

**Session Description :** The session starts at 2:00 PM by welcoming of guests. Mr. Lal Babu Purbey starts the session by introducing the students about the Angular framework. The experts tell the students about various features of this framework and its usage. The students have hands-on experience of Angular in the guidance of the expert.

**Audience :** 2<sup>nd</sup> & 3<sup>rd</sup> Year CSE Students

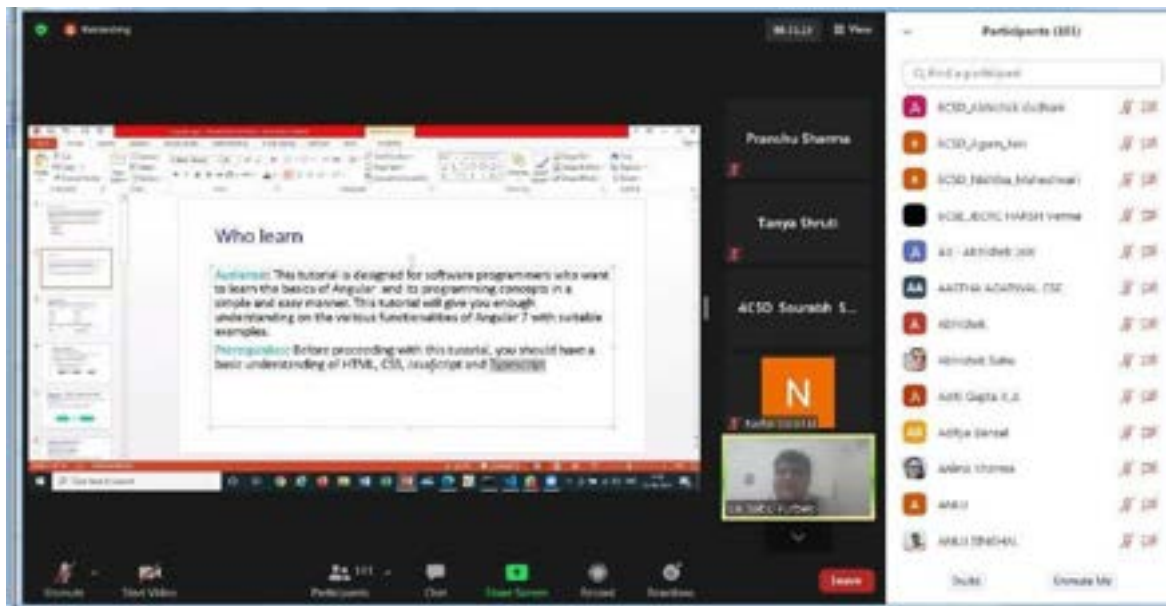

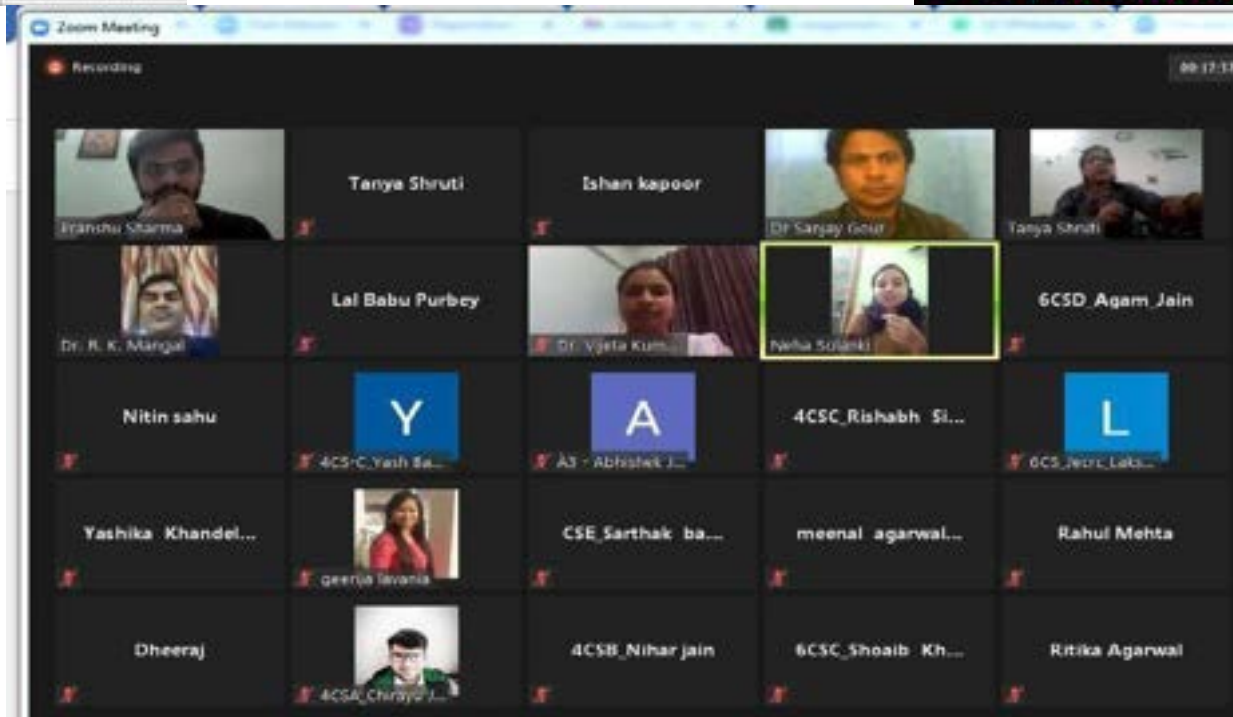

**Attendance :** Attached

Angular is a platform and framework for building single-page client applications using HTML and TypeScript. Angular is written in TypeScript. It implements core and optional functionality as a set of TypeScript libraries that you import into your applications.

The architecture of an Angular application relies on certain fundamental concepts. The basic building blocks of the Angular framework are Angular components that are organized into *NgModules*. NgModules collect related code into functional sets; an Angular application is defined by a set of NgModules. An application always has at least a *root module* that enables bootstrapping, and typically has many more *feature modules*.

- Components define *views*, which are sets of screen elements that Angular can choose among and modify according to your program logic and data.
- Components use *services*, which provide specific functionality not directly related to views. Service providers can be *injected* into components as *dependencies*, making your code modular, reusable, and efficient.

Modules, components and services are classes that use *decorators*. These decorators mark their type and provide metadata that tells Angular how to use them.

- The metadata for a component class associates it with a *template* that defines a view. A template combines ordinary HTML with Angular *directives* and *binding markup* that allow Angular to modify the HTML before rendering it for display.
- The metadata for a service class provides the information Angular needs to make it available to components through *dependency injection (DI)*.

An application's components typically define many views, arranged hierarchically. Angular provides the Router service to help you define navigation paths among views. The router provides sophisticated in-browser navigational capabilities.

**WORKSHOP ON Cyber Security**

Event : **Workshop On Cyber Security**  
Category : Workshop  
Area : Computer Networking and Cyber Security  
PO's Covered : PO3, PO5, PO6, PO10  
PSO Covered : PSO1  
Date & Time : Wednesday, May 26<sup>th</sup> 2021 & 12:00 PM to 02:30 PM  
Platform : Zoom Application  
Expert : Mr. Shovik Dutta  
Information Security Analyst  
CYBEROPS InfoSec LLP, Jaipur

Contact: +91-9116117170  
E-mail: [shovik@cyberops.in](mailto:shovik@cyberops.in)

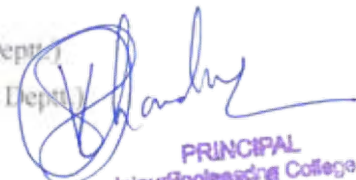

**Company Profile :** Cyberops is India's leading organization in the field of Information security. Advancement in technology and interconnected business ecosystems has combined to increase exposure to cyber attacks. We aim to digitally shield the cyberspace by offering various products and services. We are hovering to influence our proficiency and global footprint in the field of information security and cyber crime investigation. We foster certified trainings on Information Security and provide penetration testing for security audits, and Cyber Crime Investigation services for various sectors to meet their specific needs.

**Session Description :**

The session starts at 12:00 PM by welcoming guests. Mr. Shovik Dutta starts the Session by introducing the students about the latest trends in the field of computer networks. The expert tells the students about various types of cyber security threats and the solutions to prevent them.

Mr. Shovik Dutta explains the basic ways of cyber crimes and latest case studies of the same. The students have hands-on experience of cyber attacks and security in the guidance of the expert.

A cyber attack is an assault launched by cybercriminals using one or more computers against a single or multiple computers or networks. A cyber attack can maliciously disable computers, steal data, or use a breached computer as a launch point for other attacks.

**What are the 4 types of cyber attacks?**

- Brute-force attack. Under this attack, cybercriminals use the trial and error approach to guess the password successfully.
- Credential Stuffing.
- Phishing and Spear Phishing.
- Malware attacks.

**Top 5 most notorious cyber attacks**

- WannaCry: A real epidemic. The WannaCry attack put ransom ware and computer malware in general, on everyone's map, even those who don't know a byte from a bite.
- NotPetya/ExPetr: The costliest cyber attack to date.
- Stuxnet: A smoking cyber gun.
- Dark Hotel: Spies in suite rooms.
- Mirai: The fall of the Internet.

**How do hackers attack?**

How do hackers use it? Hackers use malware to steal data directly from victims' computers using spyware, remote administration malware, brute forced passwords, planting malware on victims' devices via infected websites and transmitting malicious attachments or links by email.

**How do cyber attacks occur?**

A cyber attack occurs when cybercriminals try to gain illegal access to electronic data stored on a computer or a network. It occurs when information is accessed without authorization. The information accessed could include personal information such as Social Security numbers, passwords, and financial account numbers.

**Can cyber attacks be prevented?**

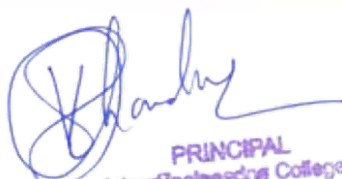

It almost seems naive to think you can prevent a cyber attack. But, in fact, the majority of cyber attacks are prevented either by endpoint security tools like endpoint detection and response (EDR) software and next-gen antivirus applications, or strict security policies and compliance guidelines, or security hardware.

Jaipur Engineering College &  
Research Centre  
Tonk Road, Jaipur-502002

### The facilitator were

### What did you like Best about this workshop?

It was very informative

--

The way speaker talk and interact

His way of expressing bot bounty and ethical hacking

It brought unrest in a field which I did not even thought off

Teachers are Responsive to Participant's Questions

It was an interesting workshop

The knowledge of hacking world

The facilitator gives the brief information about the hacking and much more responsive to the queries.

**PRINCIPAL**  
Jaipur Engineering College &  
Research Centre  
Tonk Road, Jaipur-302002

What did you like least about this workshop?

Nothing

Network problem

--

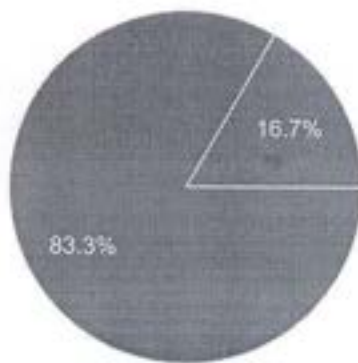

We couldn't get while information.. All information was somewhere or other incomplete

Showed new opportunities

I like the whole session actually

All over the workshop is very nice but they can also give some practical for more interactive session

Are you Interested in Module-1 Training of Cyber Security?

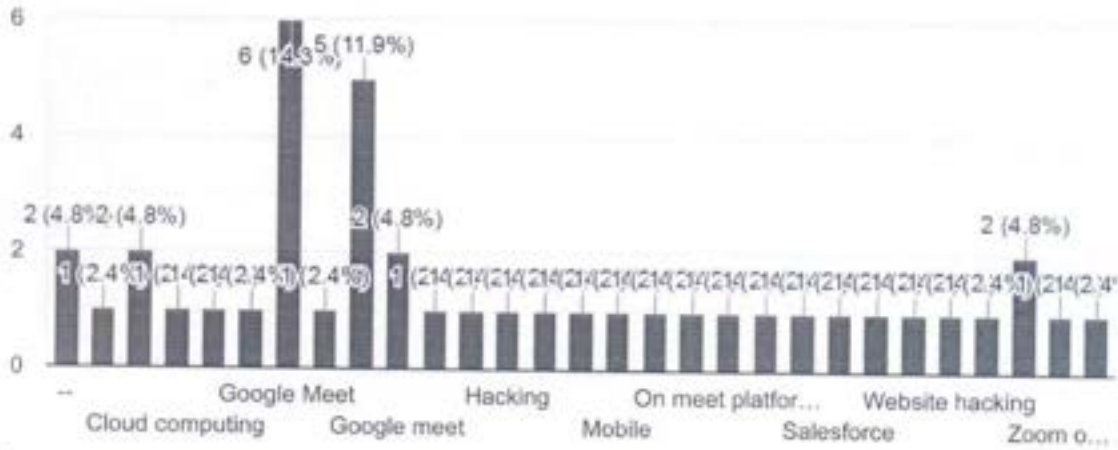

● Yes  
● No

**PRINCIPAL**

## Department of Civil Engineering

### WORKSHOP ON DESIGN SOFTWARES IN CIVIL ENGINEERING

Abhijeet Subhash Patankar  
Regional Manager  
INDIA

2016-CADD Expert-  
Kingdom Of Bahrain

2013-AMSCO Manager  
Nigeria

2009-International  
Business

Department of Civil engineering of JECRC organized a 2 days workshop on the Design software's in Civil Engineering . In today's era of it is very essential to have more than one skill to survive in the competition, Department of civil engineering of JECRC is putting all the efforts to make all of its students technically skilled with all the knowledge of these soft wares.

## **ABOUT CADD CENTRE**

As Asia's biggest network of CAD training Centres, CADD Centre Training Services is the training arm of the 30-year-old CADD Centre Group, head quartered at Chennai, India.

Founded in the year 1988, they have grown today as Asia's biggest network of skill training provider in Computer Aided Design (CAD), Computer Aided Engineering (CAE), and Project Management. They host a wide array of courses, certifications, placement assistance and career planning tools to help students get the most from their education. They have nurtured careers of over 1.5 million engineers, graphic designers, and management professionals each touching heights across the world.

**MR. ABHIJEET SUBHASH PATANKAR** is an experienced **Project Management Consultant** with a demonstrated history of working in the education industry. He is an expert in Computer-Aided Design (CAD) and has strong knowledge in Project Management Tools and Graduate Program in Construction Project Management from NICMAR. He did his Master Diploma in CAD /CAM /CAE from College of Engineering Pune and his Diploma in Mechanical from S.R.G. SABLEHADAPSAR, PUNE

## ABOUT THE EVENT

The session was thoroughly interactive, thought provoking and easy to comprehend. The HOD Sir welcomed the guest and set up the platform for him to begin. An active participation was witnessed by the whole of Civil & Mechanical Department Students. The basic and important agenda of the event was to spread awareness among students about the need and requirement of present-day scenario regarding the different and important Designing, Structural and Analytical Software(s) in the Construction Field. The software(s) are as follows:

- AutoCAD 2D/3D
- Revit Architectural
- 3DSMAX Pro
- STAAD Pro

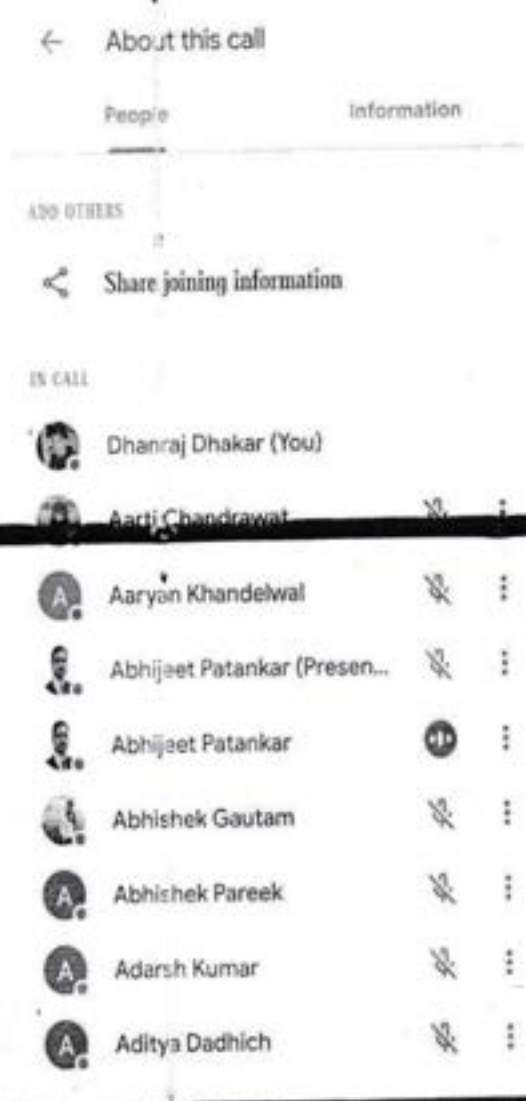

Being the two days grand webinar the audience for the first day was the second year and for the next day both the third and the fourth year simultaneously. There was approximately an active participation of 150+ students the first day and 400+ the second. The questionnaire round cleared everyone's doubts and queries on

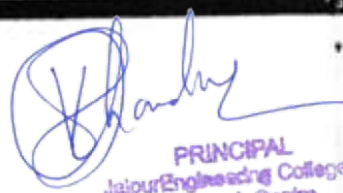

several topics and the students were gladly satisfied with the answers hence leaving no room for doubts. It made students realise the need of the generation and technology of the present situation and made them aware about the various companies' requirements. It highlighted the ongoing Civil Projects in INDIA and the major Companies involved in it. It also portrayed the contribution made by the construction and civil line in both The Present and The Past GDP of INDIA. The future plan of Construction Sector involves 321 Billion contribution in INDIA'S GDP. Hence the need of the hour and its prerequisite.

**Expert**

: Mr. Sai Kiran Challa  
Computer Scientist (Software Development Engineer),  
Adobe

**Contact:** +1 385 2288 350  
**E-mail:** [schalla@adobe.com](mailto:schalla@adobe.com)

**Company Profile** : Adobe Inc. is an American Multinational Computer Software Company founded in 1982 by John Warnock and Charles Geschke. It has historically specialized in software for the creation and publication of a wide range of content, including graphics, photography, illustration, animation, multimedia/video, motion pictures and print. Adobe has millions of users worldwide. Adobe Acrobat Reader and the portable Document Format (PDF) tools are used for printing and publishing.

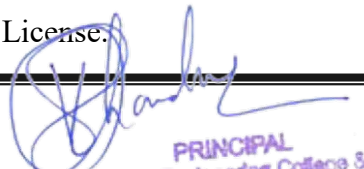

**Company Address** : Adobe World Headquarters, San Jose, California, U.S.A.

**Company Contact** : Tel No.: 408-536-6000

**Departmental Organizer** : 1. Ms. Sweety Singhal (Assistant Professor, CSE Deptt.)  
2. Ms. Garima Garg (Assistant Professor, CSE Deptt.)

**Session Description** : The session starts at 8:30 AM by welcoming of speaker and participants. Head of the department Prof. Dr. Sanjay Gour welcomes the esteemed speaker Mr. Sai Kiran Challa. Prof. Gour shares his opinion about the latest technology i.e. MongoDB with students. After that session was handed over to our keynote speaker. Mr. Sai Kiran starts the session by introducing the students about latest trends in the field of database management system.

MongoDB World is just around the corner, and you might be wondering, why should I go? By not attending, you'd be missing out on great educational opportunities! MongoDB is a leading NoSQL database used by teams that require flexibility and performance. MongoDB is open source and has many options for cloud hosting. Learn the core concepts of MongoDB needed to build production-ready applications. MongoDB is a cross-platform document-oriented database. Classified as a NoSQL database, MongoDB eschews the traditional table-based relational database structure in favor of JSON-like documents with dynamic schemas, making the integration of applications easier and faster. MongoDB is developed by MongoDB Inc. and is published as free and open source software under a combination of the GNU Affero General Public License and the Apache License.

PRINCIPAL  
Jaipur Engineering College &  
Research Centre  
Tonk Road, Jaipur-302002

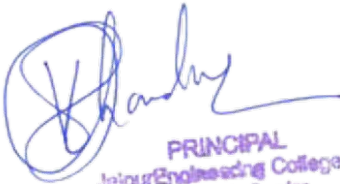

The experts tell the students about various types of database and give an exposure of MongoDB hands-on in a very interactive way.

He also gives advice to students about future opportunity in USA. He also shares his experience of USA life style.

The workshop ends with vote of thanks to our esteemed speaker Mr. Sai Kiran Challa, Head of dept., faculty members and students.

**Audience** : Engineering students of JECRC and other colleges

### Remarks

248 responses

great session by sir

It was great workshop

NA

Brilliant

Sessions which are practical based like these are more understandable. Thank you for the wonderful session on MongoDB

N

It was a knowledgeable workshop.
