The National Society for Education Research and Development was setup and registered in the year 1999 in Jaipur with the major objective of providing quality education and research environment in Rajasthan. Keeping this objective in view the pioneers in the field of education implanted JECRC Foundation in the year 2000. With the remarkable success the foundation achieved within a short span of time, today it has two institutions that conducts UG, PG and PhD programs in several disciplines duly approved by the UGC and AICTE, Government of India with the student strength exceeding 10000. The Foundation has an active collaboration with several industries. Our alumni have been placed in industries of repute and have also been pursuing higher studies abroad at prestigious universities. The foundation has the legacy of nurturing the essence of growth in education with the prime focus being holistic development of the students, thus becoming the most preferred choice for students with a variety of academic pursuits.

About CSE Department

The Department of Computer Science & Engineering was established in 2001. The Department aims at developing the technical skills among students. To accomplish this many events have been organized like Hackathons, Ideathons, and many different seminars and workshops to enhance the skills and overall personality of students. To enhance the entrepreneurship skills and research skills, the Department has established excellence in teaching and learning. The Department not only focuses on technical skill but also provides different educational opportunities and support groups which help in creating technical as well as non-technical awareness. The fundamental aim of Department is to provide students opportunity at every pace.
