At Liquid Analytics, we are a data-driven company committed to empowering businesses with state-of-the-art real-time streaming analytics. As part of our **Internship Program (March–April 2025)**, selected students will work closely on our flagship product, Longbow, and gain invaluable exposure to cutting-edge technology.

### Role: Software Data Engineer

#### Key Requirements:

- Proficiency in **Python, SQL, and JavaScript**.
- Familiarity with more than one programming language is highly desirable.
- Strong communication skills, both verbal and written, are essential.
- An **engineering mindset** with a keen focus on problem-solving and innovation.
- Knowledge of **DevOps** is an added advantage.

#### Program Benefits:

- **Stipend:** ₹20,000 per month during the internship.
- **Pre-Placement Offers (PPO):** Based on performance, up to 40% of interns will be offered a **full-time role**.
- **CTC for Full-Time Role:** ₹6 to ₹10 lakhs per annum, depending on performance during the internship and final evaluation.

We believe this is a fantastic opportunity for your students to gain hands-on industry experience, contribute to meaningful projects, and build a strong foundation for a thriving career in technology and analytics.

Please feel free to share this opportunity with your students. We are also happy to schedule a session with them to discuss the internship program in detail and answer any questions they may have.

Looking forward to your response and a successful collaboration.

Dear Ramesh Rawat Sir,

It was pleasure talking to you over the phone.

We hire individuals for our non – voice programs from time to time for the following processes:

### Chat and Email Customer Service Representative

Our client is the global leader for online shopping, an industry whose existence cannot be ignored. Online shopping has completely changed the way we look at our shopping requirements. The expectations which we have from individuals whom we hire:

- Amazing fluency – written English
- Accurately understand and resolve the customer concerns
- The term "customer" would describe someone who would wish to purchase or sell a product/products/product catalogue/collection on the client website
- Though most customers raise basic concerns which results in a lower turnaround time, there are some wherein sellers would like to understand how they can expand their business and ultimately achieve a higher revenue and profit. This is where a lot of research and analytical skills come into the picture which helps in providing a very satisfactory resolution to sellers – the goal here is to get business on a regular interval from the customers
- Patience – a key aspect of the job. Not all customers are satisfied with a resolution which is provided though it is as per the policies/guidelines laid down by the client. To be able to handle such situations by keeping calm and at the same time convincing the customer about the resolution provided
- Retention – It is very important to be aware of the policies laid down by the client and also be aware of any product updates which come from the client. Effectively, absorbing and retaining content delivered throughout the training period and clear assessments conducted during that particular period
